

# Christmas wishes to you and yours from Kathleen Falk Designs

This is a very simple box to assemble. Simply cut around outside edge score on burgundy lines (scoring is the process of using a ruler and a blunt end pointed object to go over lines so that they will fold easily) and fold. Finally glue flaps to adjoining trees and repeat for box bottom on page 2.

Christmas box bottom. Box bottom slides into Box top on page one after assembly of both pieces. This is also quite adorable printed on small photo paper, then you may insert a tiny gift, attach a ribbon and hang on your tree or from mantle garland. Hope you have as much fun assembling it as I had designing it.
